## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-33, drawn to method of making a full-length coding sequence and expression vector.

Group II, claim(s) 34, drawn to a fusion protein.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

(A) The invention has no special technical feature that define the contribution over the prior art,  
or

(b) Unity of invention between different categories of invention will only be found to exist if specific combinations of inventions are present. Those combination include:

- 1) A product and a special process of manufacture of said product.
- 2) A product and a process of use of said product.

Art Unit: 1637

3) A product, a special process of manufacture of said product, and a process of use of said product.

4) A process and an apparatus specially designed to carry out said process.

5) A product, a special process of manufacture of said product and an apparatus specially designed to carry out said process.

The allowed combination do not include multiple products, multiple methods of using said product, multiple methods of making multiple products as claimed in the instant application: see MPEP 1850. In the instant case, Applicant's claims encompass multiple inventions, polynucleotide, kit, vaccine, polypeptide and multiple methods of using the polypeptide. MPEP states that "if multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application, the first recited invention of each of the other categories related thereto will be considered as the main invention in the claims ", see PCT Article 17(3)(a) and 1.476(c)."

In the instant invention the claims not only comprise multiple inventions but the "the claims do not share "a special technical feature" because a method of making a full-length coding sequence as claimed is known and practice in the prior art (Carninci et al. Genomics, November 1996). Additionally fusion proteins and general procedures for making fusion proteins are well known in the art.

Additionally the inventions are distinct, each from the other because of the following reasons:

Art Unit: 1637

The fusion protein is patentably distinct from the method of making a full length coding sequence because the fusion protein can be used in a materially different process such as in a two-hybrid system.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Cynthia Wilder whose telephone number is (703) 305-1680. The examiner can normally be reached on Monday through Thursday from 9:30 am to 6:30 pm and on Friday from 9:30 am to 1:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion, can be reached at (703) 308-1119. The official fax phone number for the Group is (703) 308-4242. The unofficial fax number is (703) 308-8724.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Group's receptionist at (703) 308-0196.
